⁽a) To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors. When sector categorization is broken down by industry, no industry exceeds the 25% maximum specified in the Statement of Additional Information.

Notes to Quarterly Portfolio of Investments June 30, 2023 (Unaudited)

1. ORGANIZATION

ALPS Series Trust (the "Trust"), a Delaware statutory trust, is an open-end management investment company registered under the Investment Company Act of 1940, as amended ("1940 Act"). The Trust consists of multiple separate portfolios or series. This quarterly report describes the Carret Kansas Tax-Exempt Bond Fund (the "Fund" or "Kansas Tax-Exempt Bond Fund") formally known as the American Independence Kansas Tax-Exempt Bond Fund. On September 13, 2019, Carret Asset Management, LLC (the "Adviser" or "Carret") became the adviser to the Kansas Tax-Exempt Bond Fund, changing the Fund's name from American Independence to Carret. The Fund's investment objective is to preserve capital while producing current income for the investor that is exempt from both federal and Kansas state income taxes. The Fund is considered non-diversified and may invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund. The Fund currently offers Institutional Class Shares and Class A Shares. Each share class has identical rights to earnings, assets and voting privileges, except for class specific expenses and exclusive rights to vote on matters affecting only individual classes. The Board of Trustees (the "Board") may establish additional funds and classes of shares at any time in the future without shareholder approval.

2. SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America for investment companies ("U.S. GAAP"). The Fund is considered an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946. The preparation of financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the period. Actual results could differ from those estimates. The following is a summary of significant accounting policies consistently followed by the Fund in preparation of its financial statements.

Investment Valuation: The Fund generally values its securities based on market prices determined at the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern Time, on each day the NYSE is open for trading.

The market price for debt obligations is generally the price supplied by an independent third-party pricing service approved by the Board, which may use a matrix, formula or other objective method that takes into consideration quotations from dealers, market transactions in comparable investments, market indices and yield curves. If vendors are unable to supply a price, or if the price supplied is deemed to be unreliable, the market price may be determined using quotations received from one or more broker-dealers that make a market in the security.

Redeemable securities issued by open-end registered investment companies are valued at the investment company's applicable net asset value ("NAV"). Money market funds, representing short-term investments, are valued at their NAV.

When such prices or quotations are not available, or when the Fair Value Committee appointed by the Board believes that they are unreliable, securities may be priced using fair value procedures approved by the Board.

Fair Value Measurements: The Fund discloses the classification of its fair value measurements following a three-tier hierarchy based on the inputs used to measure fair value. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability that are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability that are developed based on the best information available.

Various inputs are used in determining the value of the Fund's investments as of the end of the reporting period. When inputs used fall into different levels of the fair value hierarchy, the level in the hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The designated input levels are not necessarily an indication of the risk or liquidity associated with these investments. These inputs are categorized in the following hierarchy under applicable financial accounting standards:

- Level 1 Unadjusted quoted prices in active markets for identical investments, unrestricted assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 Quoted prices which are not active, quoted prices for similar assets or liabilities in active markets or inputs other than quoted prices that are observable (either directly or indirectly); and
- Level 3 Significant unobservable prices or inputs (including the Fund's own assumptions in determining the fair value of investments) where there is little or no market activity for the asset or liability at the measurement date.

The following is a summary of the inputs used to value the Fund's investments as of June 30, 2023:

	Level 1 - Quoted and Unadjusted	evel 2 - Other Significant Observable	Level 3 - Significant Unobservab		
Investments in Securities at Value*	Prices	Inputs	Inputs		Total
Municipal Bonds	\$ _	\$ 126,348,701	\$	_	\$ 126,348,701
Short Term Investments	965,373	_		_	965,373
Total	\$ 965,373	\$ 126,348,701	\$	_	\$ 127,314,074

^{*} For a detailed Sector breakdown, see the accompanying Portfolio of Investments.

As of June 30, 2023, the Fund did not hold any level 3 securities.

Securities Purchased on a When-Issued Basis: The Fund may purchase securities on a "when-issued" basis. When-issued securities are securities purchased for delivery beyond the normal settlement date at a stated price and/or yield, thereby involving the risk that the price and/or yield obtained may be more or less than those available in the market when delivery takes place. At the time the Fund makes the commitment to purchase a security on a when-issued basis, the Fund records the transaction and reflects the value of the security in determining net asset value. Normally, the settlement date occurs within one month of the purchase. No payment is made by the Fund and no interest accrues to the Fund during the period between purchase and settlement.

Cash & Cash Equivalents: The Fund considers its investment in a Federal Deposit Insurance Corporation ("FDIC") insured interest bearing account to be cash and cash equivalents. Cash and cash equivalents are valued at cost plus any accrued interest. The Fund maintains cash balances, which, at times may exceed federally insured limits. The Fund maintains these balances with a high-quality financial institution.

Concentration of Credit Risk: The Fund places its cash with a banking institution, which is insured by FDIC. The FDIC limit is \$250,000. At various times throughout the year, the amount on deposit may exceed the FDIC limit and subject the Fund to a credit risk. The Fund does not believe that such deposits are subject to any unusual risk associated with investment activities.

The Fund invests primarily in debt obligations issued by the State of Kansas and its respective political subdivisions, agencies and public authorities. The Fund is more susceptible to economic and political factors adversely affecting issuers of Kansas specific municipal securities than are municipal bond funds that are not concentrated in these issuers to the same extent.

Trust Expenses: Some expenses of the Trust can be directly attributed to a fund. Expenses that cannot be directly attributed to a fund are apportioned among all funds in the Trust based on average net assets of each fund, including Trustees' fees and expenses.

Fund Expenses: Some expenses can be directly attributed to the Fund and are apportioned among the classes based on average

Class Expenses: Expenses that are specific to a class of shares are charged directly to that share class. Fees provided under the distribution (Rule 12b-1) and/or shareholder service plans for a particular class of each Fund are charged to the operations of such class.

Investment Transactions and Investment Income: Investment transactions are accounted for on the date the investments are purchased or sold (trade date basis for financial reporting purposes). Realized gains and losses from investment transactions are reported on an identified cost basis. Interest income, which includes accretion of discounts and amortization of premiums, is accrued and recorded as earned based on the effective yield method. Dividend income is recognized on the ex-dividend date. All of the realized and unrealized gains and losses and net investment income are allocated daily to each class in proportion to its average daily net assets.

Distributions to Shareholders: Distributions from net investment income for the Fund are declared daily and paid monthly. Distributions from net realized capital gains, if any, are distributed at least annually. Income dividend distributions are derived from interest and other income the Fund receives from its investments, including short-term capital gains. Long-term capital gain distributions are derived from gains realized when the Fund sells a security it has owned for more than one year. A Fund may make additional distributions and dividends at other times if its investment adviser has determined that so may be necessary for the Fund to avoid or reduce taxes. Net investment income/(loss) and net realized gain/(loss) may differ for financial statement and tax purposes.
