The performance data quoted above represents past performance. Past performance is not a guarantee of future results. Investment return and value of the Fund shares will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund performance current to the most recent month-end is available by calling (833) 287-7933.

- * The Fund commenced operations on May 22, 2007. The Predecessor Fund, American Independence Kansas Tax-Exempt Bond Fund was reorganized into the Fund on September 14, 2018. Fund performance prior to September 24, 2018 is reflective of the past performance of the Predecessor Fund. The Institutional Class of the Predecessor Fund commenced operations on December 10, 1990. Class A of the Predecessor Fund commenced operations on August 6, 2002.
- (a) The Bloomberg Barclays 7-Year US Municipal Bond Index is a total return performance benchmark for the investment-grade, geographically unrestricted 7-year tax-exempt bond market, consisting of municipal bonds with maturities of 6 to 8 years.

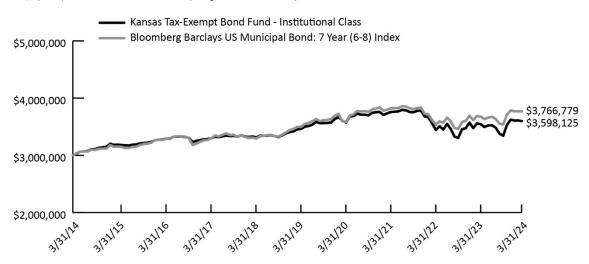

Indices are not actively managed and do not reflect deduction for fees, expenses or taxes. An investor cannot invest directly in an index.

The returns shown above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or redemption of Fund shares.

Maximum Offering Price (MOP) for Class A shares includes the Fund's maximum sales charge of 4.25%. Performance shown at NAV does not include these sales charges and would have been lower had it been taken into account.

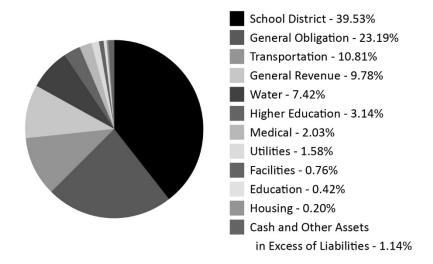

The total annual operating expenses and total annual operating expenses after fee waivers and/or reimbursement for the Fund's Institutional Class and Class A shares (as reported in the February 1, 2024 Prospectus) are 0.60% and 0.48% and 1.00% and 0.73%, respectively. The Fund's investment adviser has contractually agreed to limit expenses through January 31, 2025.

Performance of \$3,000,000 Initial Investment (as of March 31, 2024)

The graph shown above represents historical performance of a hypothetical investment of \$3,000,000 in the Institutional Class. Due to differing expenses, performance of Class A will vary. Past performance does not guarantee future results. Returns do not reflect the deduction of fees, sales charges, or taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

Portfolio Diversification (% of Net Assets as of March 31, 2024)

Examples. As a shareholder of the Carret Kansas Tax-Exempt Bond Fund, you incur two types of costs: (1) transaction costs, (2) ongoing costs, including management fees, distribution and service (12b-1) fees and other Fund expenses. The following examples are intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The examples are based on an investment of \$1,000 invested on October 1, 2023 and held through March 31, 2024.

Actual Expenses. The first line under each class in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading "Expenses Paid During October 1, 2023 and held through March 31, 2024." to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes. The second line under each class in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other mutual funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing Fund costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees or exchange fees. Therefore, the second line under each class in the table below is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

1. ORGANIZATION

ALPS Series Trust (the "Trust"), a Delaware statutory trust, is an open-end management investment company registered under the Investment Company Act of 1940, as amended ("1940 Act"). The Trust consists of multiple separate portfolios or series. This annual report describes the Carret Kansas Tax-Exempt Bond Fund (the "Fund" or "Kansas Tax-Exempt Bond Fund") formally known as the American Independence Kansas Tax-Exempt Bond Fund. On September 13, 2019, Carret Asset Management, LLC (the "Adviser" or "Carret") became the adviser to the Kansas Tax-Exempt Bond Fund, changing the Fund's name from American Independence to Carret. The Fund's investment objective is to preserve capital while producing current income for the investor that is exempt from both federal and Kansas state income taxes. The Fund is considered non-diversified and may invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund. The Fund currently offers Institutional Class Shares and Class A Shares. Each share class has identical rights to earnings, assets and voting privileges, except for class specific expenses and exclusive rights to vote on matters affecting only individual classes. The Board of Trustees (the "Board" or "Trustees") may establish additional funds and classes of shares at any time in the future without shareholder approval.

2. SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America for investment companies ("U.S. GAAP"). The Fund is considered an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946, Financial Services - Investment Companies. The preparation of financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the period. Actual results could differ from those estimates. The following is a summary of significant accounting policies consistently followed by the Fund in preparation of its financial statements.

Investment Valuation: The Fund generally values its securities based on market prices determined at the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern Time, on each day the NYSE is open for trading.

The market price for debt obligations is generally the price supplied by an independent third-party pricing service approved by the Board, which may use a matrix, formula or other objective method that takes into consideration quotations from dealers, market transactions in comparable investments, market indices and yield curves. If vendors are unable to supply a price, or if the price supplied is deemed to be unreliable, the market price may be determined using quotations received from one or more broker-dealers that make a market in the security.

Redeemable securities issued by open-end registered investment companies are valued at the investment company's applicable net asset value ("NAV"). Money market funds, representing short-term investments, are valued at their NAV.

When such prices or quotations are not available, or when the valuation designee appointed by the Board believes that they are unreliable, securities may be priced using fair value procedures utilized by the valuation designee.

Fair Value Measurements: The Fund discloses the classification of its fair value measurements following a three-tier hierarchy based on the inputs used to measure fair value. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability that are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability that are developed based on the best information available.

Various inputs are used in determining the value of the Fund's investments as of the end of the reporting period. When inputs used fall into different levels of the fair value hierarchy, the level in the hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The designated input levels are not necessarily an indication of the risk or liquidity associated with these investments. These inputs are categorized in the following hierarchy under applicable financial accounting standards:

Level 1 – Unadjusted quoted prices in active markets for identical investments, unrestricted assets or liabilities that the Fund has the ability to access at the measurement date;

- Level 2 Quoted prices which are not active, quoted prices for similar assets or liabilities in active markets or inputs other than quoted prices that are observable (either directly or indirectly); and
- Level 3 Significant unobservable prices or inputs (including the Fund's own assumptions in determining the fair value of investments) where there is little or no market activity for the asset or liability at the measurement date.

The following is a summary of the inputs used to value the Fund's investments as of March 31, 2024:

				Level 2 - Other			
	Leve	I 1 - Quoted and		Significant	L	evel 3 - Significant	
Investments in Securities at Value*	Una	djusted Prices	С	Observable Inputs	Ur	observable Inputs	Total
Municipal Bonds	\$	_	\$	121,776,911	\$	- \$	121,776,911
Short Term Investments		870,347		_		_	870,347
Total	\$	870,347	\$	121,776,911	\$	- \$	122,647,258

There were no Level 3 securities held in the Fund during the year ended March 31, 2024.

Securities Purchased on a When-Issued Basis: The Fund may purchase securities on a "when-issued" basis. When-issued securities are securities purchased for delivery beyond the normal settlement date at a stated price and/or yield, thereby involving the risk that the price and/or yield obtained may be more or less than those available in the market when delivery takes place. At the time the Fund makes the commitment to purchase a security on a when-issued basis, the Fund records the transaction and reflects the value of the security in determining net asset value. Normally, the settlement date occurs within one month of the purchase. No payment is made by the Fund and no interest accrues to the Fund during the period between purchase and settlement.

Cash & Cash Equivalents: The Fund considers its investment in a Federal Deposit Insurance Corporation ("FDIC") insured interest bearing account to be cash and cash equivalents. Cash and cash equivalents are valued at cost plus any accrued interest. The Fund maintains cash balances, which, at times may exceed federally insured limits. The Fund maintains these balances with a high-quality financial institution.

Concentration of Credit Risk: The Fund places its cash with a banking institution, which is insured by FDIC. The FDIC limit is \$250,000. At various times throughout the year, the amount on deposit may exceed the FDIC limit and subject the Fund to a credit risk. The Fund does not believe that such deposits are subject to any unusual risk associated with investment activities.

The Fund invests primarily in debt obligations issued by the State of Kansas and its respective political subdivisions, agencies and public authorities. The Fund is more susceptible to economic and political factors adversely affecting issuers of Kansas specific municipal securities than are municipal bond funds that are not concentrated in these issuers to the same extent.

Trust Expenses: Some expenses of the Trust can be directly attributed to a fund. Expenses that cannot be directly attributed to a fund are apportioned among all funds in the Trust based on average net assets of each fund, including Trustees' fees and expenses.

Fund Expenses: Some expenses can be directly attributed to the Fund and are apportioned among the classes based on average net assets of each class.

Class Expenses: Expenses that are specific to a class of shares are charged directly to that share class. Fees provided under the distribution (Rule 12b-1) and/or shareholder service plans for a particular class of each Fund are charged to the operations of such class.

Federal Income Taxes: The Fund complies with the requirements under Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and intends to distribute substantially all of its net taxable income and net capital gains, if any, each year so that it will not be subject to excise tax on undistributed income and gains. The Fund is not subject to income taxes to the extent such distributions are made.

As of and during the six months ended March 31, 2024, the Fund did not have a liability for any unrecognized tax benefits in the accompanying financial statements. The Fund recognizes interest and penalties, if any, related to tax liabilities as income tax expense in the Statement of Operations. The Fund files U.S. federal, state and local income tax returns as required. The Fund's tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax return for federal purposes and four years for most state returns. The Fund's administrator has analyzed the Fund's tax positions taken on federal and state income tax returns

for all open tax years and has concluded that as of March 31, 2024, no provision for income tax is required in the Fund's financial statements related to these tax positions.

Investment Transactions and Investment Income: Investment transactions are accounted for on the date the investments are purchased or sold (trade date basis for financial reporting purposes). Realized gains and losses from investment transactions are reported on an identified cost basis. Interest income, which includes accretion of discounts and amortization of premiums, is accrued and recorded as earned based on the effective yield method. Dividend income is recognized on the ex-dividend date. All of the realized and unrealized gains and losses and net investment income are allocated daily to each class in proportion to its average daily net assets.

Distributions to Shareholders: Distributions from net investment income for the Fund are declared daily and paid monthly. Distributions from net realized capital gains, if any, are distributed at least annually. Income dividend distributions are derived from interest and other income the Fund receives from its investments, including short-term capital gains. Long-term capital gain distributions are derived from gains realized when the Fund sells a security it has owned for more than one year. A Fund may make additional distributions and dividends at other times if its investment adviser has determined that doing so may be necessary for the Fund to avoid or reduce taxes. Net investment income/(loss) and net realized gain/(loss) may differ for financial statement and tax purposes.

3. TAX BASIS INFORMATION

Tax Basis of Distributions to Shareholders: The character of distributions made during the period from net investment income or net realized gains may differ from its ultimate characterization for federal income tax purposes. Also, due to the timing of dividend distributions, the fiscal year in which amounts are distributed may differ from the fiscal year in which the income or realized gain were recorded by the Fund. The amounts and characteristics of tax basis distributions are estimated at the time of distribution and composition of distributable earnings/(accumulated losses) are finalized at fiscal year-end.
